I would like to register my dismay at the proposed Aquind project and the disruption it will cause to the City of Portsmouth. I have read and digested the Aquind website and see very little benefit from a privately owned company disrupting one of the two gateways in and out of our island city. Offering more competition to consumers is little compensation in a market already saturated.

This scheme has little to do with improving the lives of residents and it would appear everything to do with private profit and control of the market.

Thanks,

Matt Loten
Portsmouth Resident.
