To Whom It May Concern,

I object in the strongest possible terms to the Aquind proposal going ahead.

I see no reason not benefit to the area and in fact see only negative impacts from huge parts of our city being fenced off and unusable; my business relies on being able to use our public green spaces every day.
I also do not understand why a nature reserve (Milton Common) is being disturbed again (after the sea defence works a few years ago) when surely the cables could run under Langston's Harbour and be replaced every ten(?) or so years as needed to maintain them.
In addition to this, lots of people will lose their allotments; this will have negative impacts for those people and their families.
I would like to once again take the opportunity to object to this proposal, which this far has simply been pushed through regardless of what is local people think and feel.
