Subject: Objection to Aquind Connector project
Date: 05 October 2020 21:14:04

I am a resident of [redacted] front door on [redacted] I strongly object to the implantation of electric pipes disrupting residence and homes, wildlife as well as the environmental impact on the eastern side especially but also the the city as a whole is untenable, and the project should therefore be cancelled.

Quite apart from the environmental impact I think it is politically unacceptable to be purchasing energy from France. Obviously there are powerful backers pushing this agenda but I and many others living in this area strongly object. Not too long ago a sink hole was found in Cockleshell and therefore there could be further serious consequences to the drilling underground.

I ask that you support us in getting this project stopped.
Thank You
Mr & Mrs Salt
