Subject: objection to Aquind Interconnector cable / Portsmouth
Date: 05 October 2020 12:40:55

Hello,

As a resident of Portsmouth [redacted] I wish to object to the plans for the Aquind Interconnector cable to be routed up the east side of Portsea Island.

This is a densely populated area and the disruption it will cause will be immense. The Eastern Road is one of only 3 main routes onto the island and the traffic problem this routing will cause will be terrible. Closing allotments and moving sheds are also not acceptable and prove that this is not the area to be trying to route this cable through.

Better alternative routes, or better still more local alternatives for the power need, should to be found.

Thank you.

Roy Husselby
