Subject: Aquind Interconnector scheme - objection
Date: 06 October 2020 20:30:59

Dear sirs / madams,

I am writing to register my objection to this scheme.

There are many reasons to object, including today's announcement by Boris Johnson of British wind power to provide all our electrical needs. Given that renewable power falls in cost over time, the Aquind scheme will not be financially viable and will be importing unneeded power.

The non-financial costs seem to include destruction of open space used by people and wildlife, destruction of allotment sites, which are important contributors to mental and physical health as well as a source of fresh food in the community.

This scheme seems to promise much disruption and much destruction for little benefit in return.

Please reject the scheme.

Yours sincerely,

Owain Clarke

Hampshire resident
