To whom or may concern,

I would like to put forward to you my objections concerning the proposed plans for the laying of pipes by Aquind in Portsmouth. I am directly affected by this proposal due to the location of my house. The route selected on the plans are invasive on many fronts. 1) Disruption to residents.Me and my family are going to be hugely affected by this and it will cause massive disruption to every resident On this island 2) Air quality. 3) The many areas that hold protected wildlife. 4) Structures that it will impact by being bulldozed.5) it is totally invasive. 6)It will have long term implications, heavy machinery undermining old brick structures. 7) we are an island with just three routes in and out, one being the "Eastern Road" where these plans will have a huge impact. We as an island are sinking and we cannot afford any firther development on his tiny island. As an island we will become gridlocked should this work happen- it's absolutely ludicrous to think our infrastructure can cope.

We have few Green Spaces here in Portsmouth that support our wildlife, three of which will be affected, those bring "Milton Green" and "Milton Allotments"and the "sea walk" commonly known as "The Three Lakes" all support a healthy range of wildlife that we are so lucky to have. A range of Newts, one in particular that is protected. Slow worms,toads, frogs, Hawks,swans. Too many to name. The times we now live in, it is so important to protect and balance our native breeds, on land and in the seas. Oysters for example, they die if silt beds are disturbed, mudbanks also hold many molluscs that will face decline if these plans go ahead. There will be nothing left for my children's future . They love going to the shore and you will be taking this away from this generation.

What in the bigger scheme of this is the most important? The promise of cheaper electricity or the continuance of so many of our wildlife? We are all too ready in this modern World to forsake that which is important to that which really is not. Allowing financial gains to win over the future of our planet. What will we leave for future generations if we do not protect that which keeps the balance of nature?

I strongly disapprove these plans- the distruption on people's lives will be huge and there will be a severe impact on the local residents and the City It's as a whole.

Yours Faithfully.
