I would like to register my objection to the proposed plans by Aquind for the pipes routing through Portsmouth.

My concerns with the current route selected are as follows:

1) There will be considerable disruption caused to residents.
2) Air quality.
3) The many areas that hold protected wildlife.
4) Structures that it will impact by being bulldozed.
5) It is totally invasive.
6) It will have long term implications, heavy machinery undermining old brick structures. 7) Portsmouth is an island with just three exits, one being the “Eastern Road” where these plans will have a huge impact.

We have few Green Spaces here in Portsmouth that support our wildlife, three of which will be affected, those being “Milton Green” and “Milton Allotments”and the “sea walk” commonly known as “The Three Lakes” all support a healthy range of wildlife that we are so lucky to have. A range of Newts, one in particular that is protected. Slow worms, toads, frogs, Hawks, swans - too many to name. The times we now live in, it is so important to protect and balance our native breeds, on land and in the seas. Oysters for example, will die if silt beds are disturbed, mudbanks also hold many molluscs that will face decline if these plans go ahead.

What in the bigger scheme of this is the most important? The promise of cheaper electricity or the continuance of so much of our wildlife? We are all too ready in this modern world to forsake that which is important to that which really is not. Allowing financial gains to win over the future of our planet. What will we leave for future generations if we do not protect that which keeps the balance of nature?

Please reject this plan.

Yours faithfully

Susan J Barrie
