To whom it may concern,
As a resident of Portsmouth I would like to complain and express concern over the environmental impact of the plans for the Aquind Interconnector.
The loss of allotments, green spaces and habitats for our wildlife across the city would be devastating to us as local residents and our wildlife.
I thought part of Brexit was protecting the UK, it's people and it's wildlife so am horrified it has been deemed important to have an electricity cable linking us to mainland France whilst causing disruption and chaos to us here in Portsmouth.
At a time of Covid our local wildlife and spaces and use of allotments to grow our own food has become even more important than ever before.
Please consider how the residents feel about this project and help us protect our city and green spaces which are imperative for our well being, our wildlife's well being for this unnecessary project. Has their even been a vote on this? I have not been asked about my opinion at all on this? It is perhaps easy to make government decisions on such matters when it doesn't impact you personally but there are many of us who this does impact on greatly.
Thank you for your consideration in this matter,
Sarah Mavrikakis.
