Subject: Objection to cable plans
Date: 03 October 2020 21:02:34

I would like to object to the current plans by Aquind to lay cables through the Milton piece allotments in Portsmouth. I have an allotment at eastney lakes / Milton piece allotments and like many others have spent many years and thousands of pounds cultivating the plot. If drilling through the site causes any lasting damage to the area and local ecosystem it will be at great detriment to not only the allotment owners but also local residents and the area as a whole due to the fact it is one of the few green spaces left in this densely populated city.

Please send me further information on the proposed plans and through what allotments would need to be dug up so the cables can pass through

Kind regards,
Matthew Crick
