Dear all

I have been made aware of the Aquind project to lay cables to the east of Portsea Island, which will effect the envoirnement, create traffic issues on an island that only has 3 routes in and out of the city and affect many people who use the Milton allotments and Bransbury park not to mention going through Langstone Harbour, a SSSI site.

I hugely object to this program and the route it is taking through our city and surrounding areas.

Kind regards

Mark Neck
