Good evening

I am writing as a mother, daughter and resident of this beautiful city. Please can you stop the project with regards to Portsmouth. We have limited space already without the thoughts of sacrificing our green space. The three roads off of portsea island are congested enough with us being the second most populated city without one of the main arteries being taken out of action. This has happened before and there was an accident on the second which brought the city to a standstill. We still don't know how many lives were out at serious risk or the numbers of those that died that night by not being able to be transported to the hospital.

I love this city. I live here and [redacted] I cannot sit silently and just hope that our worst nightmares won't come true. I respectfully request that these plans are withdrawn.

Yours sincerely

Mrs Carla Cross
