1) Portsmouth is a very densely populated city and desperately needs its few open spaces for safe recreation, especially in this time of pandemic. The proposed siting of this pipework will disrupt Brandesbury Park, Milton Common and the allotments at Eastney. As an inhabitant of the Eastney area, I find this incredibly unwise, especially at this time, and it will have far reaching detrimental impact on the citizens of Portsmouth.

2) Surely we should be concentrating our efforts on green technology, such as the proposed wind farms?

3) Why are importing energy? Surely this whole project is not only unwise but also unnecessary.
