Subject: Objection to the Aquind cable plan

Hello,
I'm emailing to express my opposition to the Aquind plan on the grounds of the unacceptable and irreversible environmental damage it will cause to the local wildlife and habitat.

The plan involves digging up and destroying green areas and nature areas. In 2020 we already know that global warming and damage to the environment is a massive worldwide problem directly caused by humans. We should be doing everything we can to protect wildlife on a local level, not contribute to its further destruction.

We are so lucky to have these nature and green areas in Portsmouth. In such a densely populated city it is an opportunity for all to enjoy nature. These green spaces also help to slightly offset the pollution and traffic fumes in the city. Destroying them will only add to our pollution levels which are already very high on a national level.

Additionally, the disruption to local people from the Aquind works would be very significant.
For all these reasons, I object to the plan and am asking for an opportunity for this to be decided at a local level.
Rachel Seward
