Dear Inspector

With reference to the proposed link it seems to me that if the cable is laid underwater across the English Channel there is no reason for it not to continue underwater up Langstone Harbour, landing at Bedhampton. There is even a tidal creek from the Hermitage Stream which could be used which conveniently goes under Harts Farm Way, the A27 and a small stream under the railway.

From there it could go alongside the A3(M) to J2 and then up tp Lovedean.

There is a large electrical sub stastion on Harts Farm Way, maybe that could be enlarged to handle the link.

Sincerely

Stuart Hales B.Sc, Pgdip, M.Sc, C.Eng, MIET
