Subject: Objection to Planned Construction in Milton
Date: 05 October 2020 18:10:37

Dear Sir/Madam

I am emailing with exceptionally strong objection to the proposed destruction of our local area in Milton, Langstone Harbour & Eastney. As individuals we can and should protect other people and the one planet we all live on. I believe your current proposals will have devastating consequences to local wildlife, local people and the local area physically. We can and should demand more of corporations who wish to make profit at the expense of mental and physical wellbeing.

Aquind have vague plans that frequently change so it is unclear how and what they plan to destroy of our community. It is alarming that the extent of destruction is not understood and can therefore be changed at anytime to include more habitats and wildlife and precious local areas.

What the proposals have already detailed include the destruction of wildlife. The consequences of increased pollution through traffic and construction could be devastating to human and animal life.

The natural habitats and green space are valued by animals who call it their home and people who derive much mental wellbeing from being in nature. Portsmouth is already over-developed and our green environment must be preserved for our short term health and wellbeing and the planets long term survival.

The allotments bring joy to local people. They provide much needed benefits to people's health and enjoyment through improving diet, health and fitness through gardening and enrich our community projects and personal development of individuals involved. Alternate plans can and should be looked at. Plans that limit impact on our community as a people and physical land.

Thank you for your time and consideration.

Kind Regards
Polly Tshabalala
