Dears Sirs,

I would like to raise my concerns and show my objections to the proposed work of Aquind in the Portsmouth area. The plans show a route that cuts through a community and through wildlife habitat and I am worried as to the scale and extent of the damage that will be caused. The work will cause traffic disruption, noise and air pollution, I admit this may be temporary, but it is the irreversible effects on areas of the shoreline that concern me most. The area known as Milton Common and adjacent coast is home to a myriad of species and the work of Aquind will destroy this. I object to these proceedings and would like this email counted as such and hope this is considered appropriately.

Kind regards,

Matt Dean
