I write to raise my objections to this proposed project. I do not believe this is right for our city it will cause huge disruption and destroy habitats of important wildlife, as well as destruction of precious allotments that are so important for wildlife, pollinators and not to even get started on the humans who derive huge psychological and physical health benefits.
This is being imposed on us by central Govt through financial rewards and incentives being given to some ministers and is another example of politicians having no thought or care for anyones interest but their own. I do not believe our city should have to put up with this.
