Subject: objection to Interconnector cable in portsmouth
Date: 06 October 2020 08:29:23

Dear sir/madam,

I am writing to express my objection to the interconnector cable in portsmouth, it will cause huge disruption to people and wildlife. I have seen the plan and cansee that it will go through many green spaces in the city which will be severely disrupted.There will be ahuge impact on wildlife in these areas. Portsmouth is a very densely populated city and has very little green space for people or wildlife, the impact of installing these cables will be huge, people wont be able to access the green spaces and wildlife will be destroyed.

During the recent lockdown due to the pandemic it was acknowledged how import green spaces have been to people to help with their physical and mental wellbeing, to disrupt these spaces and to increase disruption around peoples homes is totally unfair and unjust.

I have an allotment and i can see that the cable will go through part of the allotment site, i cant begin to explain to you the importance of allotments to people, they keep people well in all sorts of ways, they are very very important to peoples lives, it is completely unacceptable to take this away from people, some people have had their allotments for 20,30 years or more, i have had mine for over 20 years, they are a huge part of peoples lives.
There is a community allotment on milton piece site which is there for many people to access gardening including people with learning difficulties and mental health problems to visit, it is hugely important to them.

I am asking you to please listen to peoples objections including mine,,people object for a reason because they know how this will impact on peoples daily lives. Please do not install the interconnector cables in portsmouth.

yours sincerely

Tracey
