Subject: Objections to pipeline through Portsmouth
Date: 05 October 2020 08:51:11

I am requesting that alternative routes are considered for the pipeline. I have just recently seen the proposed map and noted that it will go through the Milton allotments and Farlington playing fields. These areas are used by many residents, numerous children's and adult football teams etc in a city which is very densely populated, with few open spaces. Milton common will be affected too. The ability to exercise outside, meet with others and have an enjoyable time is very important for the health of the population. The recent pandemic has only served to highlight this. The ability to go to my allotment during lockdown was my saviour.
Please consider other routes which have less impact on the people of Portmouth.
