Subject: Objection to drilling

Hello,

I am a resident of [redacted] and an allotment holder at [redacted] The plans for the route of your electricity cables go right through my allotment plot, and I am writing to object. I also oppose the disruption to the route passing through a nature reserve, with bird nesting sites. Portsmouth is the second densest conurbation in Britain, and its natural spaces are very important.

Another issue, but the national grid is outdated. More effective would be small networks of solar panels which are linked. This plan is simply a money making exercise for a few rich business men, and politicians,

Kind Regards,

Sadie Tierney
