Subject: Proposed cable cutting through Portsmouth

Dear Inspectorate and others to whom this may concern, I was shocked to hear about the possibility that my land could be completely devastated via Facebook! Nobody had the courtesy to write to me directly to tell me that [redacted] could be completely destroyed because a cable could be laid through it.

I have had my allotment for over 20 years, put a lot of work into it to get it something close to how I want it.

The allotments provide a much needed resource in an overcrowded city- fresh air, exercise, good healthy food (no additives etc), Environment for slow worms, lizards and and abundance of wildlife, meeting place for the mildest of people including a safe place to come to for my children and grandchildren.

Any plans to blitz out little piece Of perfection in this city is strongly objected to. Let me make this very clear, Aquind are not welcome- go away and think again.

Respectfully but extremely disgruntled

Simon Finney
