Dear Sir/Madam,
I would like to raise the following objections to the proposals by Aquind to go through Eastney and Milton Allotments.
In a densely packed city, the allotments may look like rough patches of land but they are loved and carefully nurtured in all weathers throughout the year and the emotional attachment people have to them shouldn't be underestimated. I now face the prospect of seeing the trees my late father planted 20 years ago, demolished without a care.
This place has a tranquil and relaxing atmosphere which would be destroyed by the noise and disturbance this work would bring.
The potential loss of trees and plants could be significant and would take a lot of time and money to recover from. A mature and productive allotment would have years of hard work destroyed in a heartbeat.
The whole place is a haven for nature. The site is home to various birds, frogs, lizards and slow worms to name but a few. Are there any plans to carry out an environmental impact assessment on the site?

This develop would have a monumental and long lasting impact on the health and well-being of many local residents at a time when most people are struggling with daily life. This would force many residents to give up their allotment for good.

Kind Regards
Mr W Chitty
