Hi

I am writing to you in connection to the above planning for the London Resort, I am one of the owners of the commercial units based on the north fleet industrial estate and proposing it amongst other owners. I feel that the infrastructure is under extreme pressure for all the private housing around that area together with blue water and option c ready to take off we in the area are not going to be able to move I have photo evidence of the traffic volume on a normal day at a normal time not rush hour and it was at a standard day photo taken on 29th July 2021 roughly 12.45pm  

As you can see it would be quicker walking. I have tried to call you but no one is ever there to speak to and when trying the link the website is always down.

Why this resort wasn't considered to be built on the marshes on the grain with easy access to Essex I do not know. That is dead land and Doesn't impact on wild life or local residents and most importantly people lively hoods and businesses in my opinion this is the wrong plot as we are suffocating in this area my family and I feel we are being pushed out of this area to move away but why should we feel like this where the land is vast in the area mentioned.

I will look forward to your response

Regards Linda Lovell
