Subject: Fwd: Ref: BC080001

Good morning Rynd and Keith i own a business on the Northfleet industrial estate employing around 10-12 people with a turnover around 2.5-3mil per annum this project is hindering our business development should we invest in new equipment or not the inconsistency of LRCH is surreal.

>

> Can this company either pull the plug and let us advance or if they are going pursue this project till it's end do so in a fit manner being transparent with business's being affected we have machinery and equipment totalling several million pounds and have to renew every 6-7 years and time is running out.

>

> So far we have had held back investment of 500k in the last 18 months due to the inconsistency of the information being released and spent only 200k.

>

> We run a location based business supplying ready mix concrete and there is no other site available for us to relocate to hence our only option would be is for LRCH's acquisition of our business and the site which is owned by myself.

>

> Can you for the love of all things holy push the people behind this to act responsibly this has been going on for nearly 9 years now.
