As a resident of Stogursey village, I am writing to express in the strongest possible terms my objection to the above application. Having seen the limited plans available for the proposed change from wet to dry storage for high-grade nuclear waste, the apparent huge increase in height alone of the unit cannot be classified as a non-material change.

EDF have attempted to push this change through as a non-material change with no proper consultation and when forced to hold a very short meeting in the village, the representatives either had no answers to questions raised or used such technical terms that the mainly lay audience had no idea what was being said. This is an extremely concerning situation which has fostered an atmosphere of complete distrust.
