

Application for Triton Knoll Offshore Wind Farm  
**Open Floor Hearing at Skegness: 13 November 2012**

**Action List**

This table records requests made by the Examining Authority (ExA) of the Applicant and Interested Parties attending the hearing, which were not completed by the end of the hearing. The ExA requests that these are completed in the manner and by the deadlines recorded in the table below. These requests are made pursuant to Rule 17 of the Infrastructure Planning (Examination Procedure) Rules 2010 (EPR). They are issued in addition to and do not replace requests in the action list arising from the Issues Specific Hearing at Skegness on 6 – 8 November.

Requests for the drafting of Development Consent Order (DCO) articles, requirements, Deemed Marine Licence (DML) conditions and or legal agreements are made without prejudice to the ExA's consideration of the planning merits of the application as a whole.

It is requested that the amendments to the draft Order requested below are submitted in the form of an updated consolidated edition of the draft Order showing both these amendments and all the applicant's previously submitted proposed changes to the Order, as tracked changes in a Microsoft Word document. Where amendments are included in the consolidated draft Order in response to these requests, a comment should be added to each individual change, associating it with the relevant action number for the request in the first column of the table.
