Subject: Re: Wylfa Newydd Generating Station

Dear Sir/Madam

On behalf of Katarzyna Twardowska - Polish Point of contact regarding notification I would like to inform you that Poland does not have intentions to participate in the Espoo procedure for the Wylfa Newydd Generating Station, but we would like to be informed about the EIA results including the measures proposed to prevent or compensate the negative impacts on the environment. Our National Atomic Energy Agency (Radiation Emergency Centre) would like to kindly ask for sending (in the future, when available) information about analytical results of safety analysis - effects of nuclear accidents (taken into consideration in EIA procedure).

Thank you in advance.

Kind regards

Dorota Toryfter-Szumańska
