---

Dear sir/madam,

**Document EN010007-003088-18**

I understand that the DCO submitted by Horizon includes a Statement of Common Ground between Horizon and National Grid, document reference EN010007-003088-18, which refers to a 400 kV **overhead** line.

National Grid cancelled the North Wales Connection project. This was confirmed by the Planning Inspectorate on February 20th 2019. Some elements of this document are no longer correct, for instance, section 1.2.3 "National Grid is promoting a second 400kV connection between the Wylfa and Pentir substations." There are numerous others.

It would be wholly inappropriate for any development consent order for the power station to include specific references to overhead lines. There is no technical, energy or planning necessity for transmission to be via overhead lines. Revision of this document is needed to reflect National Grid's decision to cancel their connection project in its entirety.

I would urge you to ensure that National Grid and Horizon make the appropriate revisions to this, and any other documents, to remove all reference to overhead lines, before the examination of the power station DCO is complete.

Thank you,

Yours faithfully,

Paul Madden
