Nov 30th 2020.

Dear Ms. Gregory,

I have been responsible for the farm alone since 1954. later I was joined by my son, I have now retired. My wife and I live in the farmhouse, adjacent to the farm yard which my son and daughter have this area is only separated by a small strip of land next to E.D.F land where they propose to develop

I am concerned for security measures, 2500 men with nothing to do in the evenings with only a strip of land separating them our property & farm equipment etc.

I have mentioned to E.D.F. representatives several times but there is no reference to a fence or a band in the application or maps.

Also I have concerns about the exit from the farm and drive and Old Peoples Home onto the road, we have slow moving and bulky farm machinery

at busy seasonal times using the road to neighbour
land

Perhaps some kind of signage at least?

I may also point out that should ^{this way} go ahead no
arrangement with my son to correct the damage
an inconvenience caused to facilitating such as
irrigation & other matters on the farm, I hope
E.D.F will consider these matters.

E.D.F have some how arranged for sea deliveries
& more train deliveries.

Nearer back to not needing the Sugwell
link road?

When go 60 m.p.h & wider verges, the
A 12 has 40 m.p.h strabules & will still be
in busy use after the completion of the power
station.

My son is [REDACTED] he lives at
[REDACTED] a short distance
from this farm.

Thank you for looking into these matters

Yours faithfully
