---

Dear Planning Inspectorate,

I have been unable to speak t this meeting. I asked to speak to Agenda item 6 but realised that Agenda item 4 was more appropriate.

I have had to leave before being invited although my hand was raised. My point was succinct so I am hoping it can be added in now. It is as follows:

The issue of Health Impact assessment should be added specifically as a principal specific issue. An HIA covers a number of issues already mentioned although I do think a retrospective health impact assessment of the ongoing construction of Hinkely Point Nuclear facility should also be considered. It will specifically cover health and well being, mental health issues as well as all the physical health impacts.

I am an individual and resident of Woodbridge so speaking on my own behalf but I am a Fellow of the Chartered Institute of Environmental Health (CIEH)

Viv Mason
