Unique reference 20026903

---

So many member of the public , whether in person or on behalf of representational groups , have voiced their concern that the overload of having to work simultaneously on two separate Public Enquiries for different power projects in this region is simply too much. The recent announcement from the SoS that the SPR DCO timetable is to be extended by 3 months makes the problem even more acute ( as if that were possible).

Without a corresponding delay to the start of the Sizewell examination everyone will be forced to try and cover both hearings at the same time which simply is too much pressure and will undoubtedly impose major disadvantages on the public and these groups .

Unique problems require unique solutions which we urge you to provide.

Yours sincerely  
Graeme Murray
