

Application by NNB Generation Company (SZC) Limited for an Order Granting Development Consent for The Sizewell C Project

The Examining Authority's written questions and requests for information (ExQ1) Issued on 21 April 2021

The following table sets out the Examining Authority's (ExA's) written questions and requests for information - ExQ1. If necessary, the Examination timetable enables the ExA to issue further rounds of written questions in due course. If this is done, the further rounds of questions will be referred to as ExQ2, ExQ3 etc.

Questions are set out using an issues-based framework derived from the Initial Assessment of Principal Issues provided as Annex B to the Rule 6 letter dated 23 February 2021 [PD-011]. Questions have been added to the framework of issues set out there as they have arisen from representations and to address the assessment of the application against relevant policies.

Column 2 of the table indicates which Interested Parties (IPs) and other persons each question is directed to. The ExA would be grateful if all persons named could answer all questions directed to them, providing a substantive response, or indicating that the question is not relevant to them for a reason. This does not prevent an answer being provided to a question by a person to whom it is not directed, should the question be relevant to their interests.

Each question has a unique reference number which starts with a unique letter(s) defining the subject of the question followed by number 1 (indicating that it is from ExQ1) and then has a question number. For example, the first question on Agriculture and soils is identified as Ag.1.0, the second question Ag.1.1 and so on. When you are answering a question, please start your answer by quoting the unique reference number.

As all parties will be aware a change request has been submitted by the Applicant. At the time of preparing the questions it had not been decided whether the change request would be accepted at all, in full or in part. Some of the questions may therefore have been superseded by a change in circumstances since they were written. If this is the case when responding to a question, please explain how the latest circumstances respond to the concern identified.

An editable Microsoft Word template of the questions will be sent separately by email to those parties to whom multiple questions have been addressed. It will assist the ExA if those parties could respond to the questions by entering their response in the appropriate

space provided below each question. The completed template should then be submitted, by **Deadline 2**, to the Examination as a PDF copy for publication accompanied by an editable Microsoft Word version for internal use.

For other parties wishing to respond, if you are responding to a small number of questions, answers in a letter will suffice. If you are answering a larger number of questions then please request a copy of the editable Microsoft Word template of the questions from the Case Team:

Email: sizewellc@planninginspectorate.gov.uk

Telephone: 0303 444 5000.

All parties should note when responding that an answer which states that a wording or other matter has been adopted in other DCOs, or elsewhere, should also include an explanation of how that answers the ExA's concern and why it would be appropriate in this case. Previous adoption of a wording or matter is not necessarily an adequate reason.

Responses are due by Deadline 2: Wednesday 2 June 2021
