Application by NNB Generation Company (SZC) Limited (“SZC Co”) for the Sizewell C Project (the “Project”)

Deadline 1 response

Dear Sirs,

This letter contains EDF Energy Nuclear Generation Limited’s (“ENGL”) Deadline 1 response in respect of the Project.

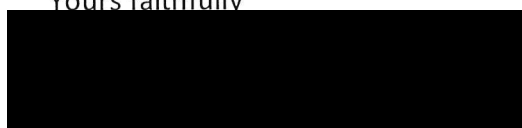

We are the owner and operator of the neighbouring Sizewell B nuclear power station and have land falling within the Order limits for the Project.

We remain strongly supportive of the principle of a new nuclear power station being developed at Sizewell. Further to our relevant representation, we continue to work with SZC Co to ensure that the construction and operation of Sizewell C is compatible with the operation and decommissioning of Sizewell B, and that the Project deals sensitively and appropriately with the use of the wider ENGL estate.

We are agreeing a draft Statement of Common Ground with SZC Co which they will submit at Deadline 2.

We do not anticipate needing to attend the compulsory acquisition hearings, however we reserve our position in this regard. We will further update the Examining Authority closer to the compulsory acquisition hearings scheduled for August.

Yours faithfully

A solid black rectangular box redacting the signature of Robert Gunn.

Robert Gunn
Station Director
