

We have attempted to review the documentation provided by SZC in respect of Change 12 [AS-005], but the information provided to date only references the potential for new plots of land to be included within the DCO boundary, without any further detail. No specific location information nor plans have been provided in respect of the Two Village Bypass. It is not clear whether/when SZC will be making this information available, and indeed whether such land will be subject to ecological survey, to the same standards as the main bypass route or otherwise (for which, please refer to FERN's Deadline 2 Submission - Written Representation (WR) - Part 3 - Ecology). We therefore confirm that we would like to make representations in relation to Change 12, but the complete absence of information provided prevents us from commenting further than the above.
