Deadline 3 called for Comments on responses to ExA's Written Questions (ExQ1)

For the avoidance of doubt, the Alde and Ore Association and many others submitted detailed Written Representations on aspects of coastal geomorphology to meet deadline 2 which meant those WRs were not seen before responses to ExA's Written Questions were submitted by the Applicant. For this reason, responding by Deadline 3 to the Applicant's D 2 responses would therefore simply involve repeating the detailed D 2 Written Representations. These still stand as unanswered.

The Applicant's responses to ExA's Written Questions could not take into account those Written Representations submitted at D2. All the issues relating to coastal geomorphology were therefore dealt with by the Applicant using their original papers and have not addressed the detailed Written Representations which called the original documents assessments into question. It is therefore hoped that the whole issue of coastal geomorphology can be discussed in the Issue Specific Hearing 6.

Thank you
Alison Andrews
Chairman of the Alde and Ore Association
