Dear Planning Inspectorate,

I would like to submit this short video MP4 of a trip I did from Bridgwater to the Hinkley C site in May 2019. The infrastructure around and leading to the site was already in place and the trip was 5 months into the build.

Should Sizewell C get the go-ahead this will be the traffic congestion, we can expect, along the A12 and the B1122. This will make journeys, especially in the early years, for locals visiting neighbouring towns, virtually impossible. The effect of holiday traffic in the mix will cause chaos and possible gridlock on the A12. There has been a marked increase in traffic this summer along the A1120, where I live, and the A12. Many of us, who live in the rural community, need to access the local towns of Halesworth, Saxmundham and Leiston if we need to visit the doctors' surgeries.

As stated, the infrastructure at Hinkley C was in place before the build commenced, this would not be the case for Sizewell C and with so much road building proposed for the area, including 3 roundabouts in less than 3 miles along the A12, add in the rail crossing at Darsham and you have a recipe for disaster with road chaos.

I would like to apply to speak at the ISH on transport.

Thank you.
