Dear Planning

I want to object strongly to the further development of Sizewell C and D . It is totally inappropriate for this area and contrary to the Climate change agenda to reduce carbon emissions and the need to invest in renewables. By the time the building is finished it will be out of date, had serious impact on the AONB, nor is there any safe disposal of radioactive waste and huge cost legacy for our young people.

Please overturn this planning proposal

Yours sincerely

Elaine Heeler
