I am writing to express my deep reservations about the proposed development of Sizewell.

I am not opposed to the delivery of a sustainable energy policy for the UK, but I am not convinced that the current deal represents the best value for money for the taxpayer, or makes adequate allowance for continuing developments in both nuclear and renewable technologies.

Furthermore, I am specifically opposed to the development for many reasons, including:

- Road transport: The construction phase will cause transport misery for everyone who lives along the A12 corridor, as well as for visitors to the area. The B1122 is totally unsuitable for the proposed volumes of traffic.
- Accommodation: The proposed accommodation campus at Eastbridge Road is completely unacceptable. Introducing three to five storey accommodation for 2400 workers will completely overwhelm the local community, be a blight on the environment, and create inevitable tensions and conflict with residents.
- Environment: The project will have a devastating effect on the internationally recognised SSSI at Minsmere and the surrounding AONB of the Suffolk Coasts and Heaths. The danger from contamination, noise and water run-off seriously threaten this natural treasure. These environmental impacts will damage the local economy, which is highly dependent on tourism, for many years.

Kind regards

Guy Parry
