19 June 2021

Dear Planning Inspector

I am sure you will have received many objections based on the devastating environmental impacts of Sizewell C, the concerns of which I fully share and feel so saddened about. Protecting biodiversity is an essential part of ensuring a sustainable future for people. I am writing however on this instance to specially raise the safety risks of nuclear power plant development in a coastal area subject to erosion at a time of climate change with all its unpredictable impacts including sea level rise. Safety risks will also be compounded by the lack of transparency over Chinese design and operation.

I would urge you therefore to ensure that proper long term consideration is given to the coastal and marine risks associated with Sizewell C in addition to all the other concerns. Many thanks

Yours faithfully

Clare Thomas
