

## **NETWORK RAIL INFRASTRUCTURE LIMITED- SIZEWELL C DCO – DEADLINE 5 SUBMISSION**

### **IP Reference: 20026630**

We write to you on behalf of our client Network Rail Infrastructure Limited in relation to the Sizewell C DCO Project.

#### Oral Submission from ISH 7 July

Please see the separate document submitted at Deadline 5.

#### Agreement and CAH Update

Network Rail and the promoter are still negotiating a private agreement, including the form of protective provisions to be entered into the Order and securing appropriate mitigation. Unfortunately, this agreement has not yet been finalised.

Assuming that this agreement is completed ahead of the Compulsory Acquisition Hearings, it will not be necessary for Network Rail to attend. However, we would like to reserve Network Rail's right to attend one of the CAHs if the agreement has not been completed, to discuss any outstanding issues.

We will of course update the Panel as soon as possible, if/when the agreement referred to above has been completed.

#### Written Representation on the proposed provision to compulsorily acquire the additional land

Network Rail confirms that the impacts are the same as those set out in its existing Written Representation (Examination Library Reference REP2-155) which should be deemed to apply to the additional land as well.

#### Updated SoCG

Please see the separate document submitted by the Promoter at Deadline 5.
