

I do not believe the Noise measurements made by SZC in their Environmental Statement are accurate or specific enough in relation to Theberton Hall, a designated Heritage Asset.

Furthermore the dismissive nature of the SZC comments in their Relevant Representation Report (page 175 & 176) go against their earlier concerns. These for both construction and site traffic.

Despite a request to SZC no details of their Noise Mitigation Scheme for has been provided.

Thus having had no satisfactory information from SZC in this matter we have taken, and are paying for, professional advice on ambient noise at Theberton Hall and will wish the recent week long sound readings to be admitted in evidence as a record.
