Dear Ms McKay

Planning Act 2008 – Section 88 and the Infrastructure Planning (Examination Procedure) Rules 2010 – Deadline 6: Deferral of Environment Agency response to Deadline 7

Application by NNB Generation Company (SZC) Limited for an Order Granting Development Consent for the Sizewell C Project

For Deadline 6 (3rd August) the Examining Authority (ExA) have requested comments on all documents submitted by NNBGenCo (SzC) Ltd at Deadline 5.

Given the substantial number of documents submitted by NNBGenCo (SzC) at Deadline 5, the Environment Agency will defer our response until Deadline 7 for the following documents:

Ref.	Name	Description
5.6Ad (A)	Sizewell Link Road Flood Risk Assessment Addendum	This is version 2 of the Sizewell Link Road Flood Risk Assessment Addendum. It has been updated to address technical queries from the Environment Agency.
8.11(C)	Code of Construction Practice - Tracked Changes Version	This is version 4 of the Code of Construction Practice. This document incorporates updates from deadlines 3, 4 and 5 submissions and any comments received. It is submitted in clean and track changes.
9.54	SZC Co. Comments on Submissions from Earlier Deadlines (Deadlines 2-4)	CONTENTS Appendix B: ACA Drainage Strategy Technical Note (DCO Task 4) Appendix I: Sizewell C Main Development Site Flood Risk Assessment: Additional Hydrological Review Appendix J: Future Adaptation of the SSSI Crossing in the DCO Submission

9.57	Acoustic Fish Deterrent Report	This report provides an overview of the fish protection measures proposed for the Sizewell C Project and explains why an Acoustic Fish Deterrent system is not proposed in the suite of mitigation measures proposed.
------	---------------------------------------	---

A number of reports and diagrams were submitted at Deadline 5 relating to coastal geomorphology. We have not provided comments at this time because this submission has not altered our position as presented at the Issue Specific Hearing on 14th July or at Deadline 5. We continue to await coastal geomorphology modelling covering the full lifetime of the development.

Yours sincerely

Simon Barlow
