Re Mr Brocks's request to me, representing S.A.G.E. at ISH 10 Biodiversity & Ecology, the Dutch Hydrogen European Court of Justice Case cited by the BEIS HRA associated with the NPS EN 1- 6 Review, March 2020, 1.2.12-14, is Case No 293/17 and Celex No 617J0293.

On the matter I wished to raise on invitation at the end of the final session, the internet went down locally cutting me off. I wished to present the expert view about marsh harriers commissioned by British Energy plc and handed on to EDF when they took over in 2009/10. This major study reviewed MH history, concluding that the major threat to this very sensitive species was/is disturbance, and then foraging during the breeding season which requires proximity to the nests which we understand are in Minsmere.

Regan Scott for S.A.G.E.
