---

I would like to add my name to the hundreds of thousands of people who oppose this scheme.

It will be a white elephant - outdated as soon as it is built. We will have moved into other areas of sustainable fuels by the late 2020's and this project will have caused devastation to areas of outstanding natural beauty. It will have driven East Suffolk with its considerable charm into the grips of a massive edifice of misery for everyone but those who seek to make money from it.
