If ever this project is approved, as far as I am concerned, it will be totally disastrous for the Suffolk coast. The infrastructure to cope with such a development is just not there, not least of all, with the latest, last minute realisation, that a water supply to accommodate would be essential. A desalination plant needed would be yet another addition, needing space and probably causing untold damage to the environment.

All that has been achieved over the years since the end of WWII at Minsmere will be under real threat and disastrous to the abundant wildlife now present. This has taken years of dedication to achieve! Tourism too will be devastated and traffic and other pollution will be unavoidable and devastating. People's lives in the communities will be ruined by pollution, noise, inaccessibility, major increases in traffic, overuse of all leisure facilities, etc etc etc. I have experienced it with Sizewell A and Sizewell B - a place of beauty and tranquility has been transformed, and now if Sizewell C and D goes ahead then the entire area becomes an industrial zone and a blot on the landscape forever. The financial implications and countryside devastation will be enormous!!! We need to stop this project before it's too late or many people will be forced to live with the consequences forever!!
