WRONG DECISION

SIZEWELL C

I am writing to urge the government not to support Sizewell C: this burden should not be placed on taxpayers.

Further, the water supply at Sizewell is now a serious problem.

The situation has changed in view of recent events. It is now obvious that the Chinese input through Huawei and our power stations must be curtailed.

The whole plan is too big, far too expensive and will be outdated long before it is completed.

The track record of SZC reactors is poor.

The site is too small for what is planned and is vulnerable to unpredictable changes in sea-level.

The work for such an extended period would damage tourism, local businesses and create unacceptable heavy traffic.

Wildlife habitat would be seriously affected in countryside of outstanding natural beauty.

The whole area, especially at Snape Maltings and Aldeburgh, is a site of international cultural interest with visitors from all over the world.

No civilized country would endanger all this.

PETER DICKINSON
