---

I would just like to add my voice to the many who have campaigned over a long period to oppose Sizewell C being given planning permission on our beautiful coast. As a resident of Yoxford I have seen our roads become increasingly busy in recent years, and 12 years of construction traffic in a rural and tourist area would be horrible

As a birdwatcher the thought of Minsmere being adversely effected is terrible. We have worked for years to bring back species that had all but disappeared in the UK and this could all be undone.

I also think Nuclear energy is not the way forward and future generations shouldn't have to deal with our dangerous waste.

Yours sincerely  
Joan Steel
