I have read the information about this development at Sizewell, and list below my considered concerns relevant to it, and wholeheartedly

disagree to any consideration of the proposed plan, for all the following reasons:

-Nuclear Energy is **NOT** a Green energy, the spent radioactive cores would take a century to neutralise wherever they are placed.

-Nuclear Energy is an out of date technology and this country should, in the twenty first century be investing in alternative progressive sources of energy notably those that are green and sustainable and not harmful to the natural environment.

Furthermore, any further development would:

-Impact on an Area of Outstanding Natural Beauty (AONB).

-Disrupt and destroy the rare natural habitats of native wildlife and migrating bird species.

-Damage an already fragile and eroding shoreline.

There is a lack of a secured long term water supply.

Uncertain coastal defences.

The proposed plan would also cause traffic disruption through small rural villages.

I know that my reasons to **NOT** go ahead with this proposal are also the view of thousands of other people, and we are speaking for those of many generations to come.

Mrs Mary Sidwell
