

## **Sizewell C**

### **Written Submission to Deadline 10**

#### **On behalf of the Boden Family of Trust Farm, Middleton**

We are writing at this deadline to express our frustration at the lack of progress with the applicant and their consultants in respect of the mitigation of the substantial effects of the Sizewell Link Road (SLR), on our clients property.

We refer to our written submission Deadline 7, setting the background to our client's property and the physical effect of the scheme which severs a substantive part of our client's farmland.

Following our initial meeting which we reported upon written submission above, 11<sup>th</sup> August we asked for key mitigating proposals in order to seek to reduce the detrimental effect of the alignment of the SLR within the 225m of our clients farmstead (at that point being a 5m embankment above ground level) and to provide a workable access to our clients land on the severed areas north of the SLR.

We met again the applicant and their consultants on 2<sup>nd</sup> September and had a constructive meeting. Thereafter we hoped that following some agreed parameters that we would receive further details prior to the end of the examination process. We received on 7<sup>th</sup> October, over a month later, and 5 days from Deadline 10, proposals which we have not yet had a further opportunity to consider with our clients.

This is not an objection in principle but a notification of the current position.

E/C/EDF/Boden/Deadline 10  
11<sup>th</sup> October 2021
