Dear Ms McKay

Application EN010012 for The Sizewell C Project by NNB Generation Company (SZC) Limited (“SZC Co.”)

Further to the publication of the Rule 8 letter on 21 April 2021 (Examination Library ref. [PD-015](#)), the Rule 8(3) and Rule 17 letter published on 18 June 2021 (Examination Library ref. [PD-027](#)), the Rule 8(3), Rule 9 and Rule 13 letter published on 10 September 2021 (Examination Library ref. [PD-050](#)), the Rule 17 letter published on 20 September 2021 (Examination Library ref. [PD-052](#)), the Rule 17 letter published on 1 October 2021 (Examination Library ref. [PD-055](#)) and the Rule 17 letter published on 6 October 2021 (Examination Library ref. [PD-054](#)), we write to provide SZC Co.’s written submissions for Deadline 10.

SZC Co.’s Deadline 10 Submissions

Appendix A of this letter contains a table that lists the Deadline 10 submissions made on behalf of SZC Co.

For each document, the table provides the document name, reference, description and confirmation of whether it is a standalone document or supersedes a previously submitted document. The table provides a brief description of the document and the reason for its submission.

Certified Documents

The full suite of control documents is submitted in final form at this deadline. The control documents secured by the Deed of Obligation are annexed to the executed Deed of Obligation (Doc Ref. 8.17(H)/10.4). For clarity and ease of reference the documents to be certified pursuant to Article 80 of the dDCO have been submitted in two locations within the document library: as a new revision at their current location and as a new document in the new “Book 10 Control Documents”. Appendix A explains where a control document is the final version of a previously submitted draft and specifies the updated document reference and the new Book 10 document reference. Although two document references are provided, the documents themselves are identical. The cover sheets identify the document with both document references.

Final Draft DCO and SI Validation

The dDCO package includes track change versions against Revisions 10 (Deadline 8) (Examination Library ref. [REP8-035](#)) and Revision 1 (Application) (Examination Library ref. [APP-059](#)). Revision 11 of the dDCO has been updated to remove unconventional numbering (e.g. articles 9A, 9B) to enable the draft SI to be successfully validated. SZC Co. has, however, been unable to obtain an SI validation report in time for Deadline 10 due to technical issues. We

NOT PROTECTIVELY MARKED

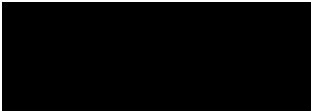

understand from the SI validation support team that these technical issues are not unique to the Sizewell C DCO but are in fact common to many draft DCOs. We understand that the SI validation team has notified the Planning Inspectorate of these issues.

Pursuant to Article 80 of the dDCO, SZC Co. must, as soon as reasonably practicable after the date on which the DCO is made, submit to the Secretary of State copies of the documents and plans for certification. Article 80(2) provides that, where certified documents make reference to provisions in the draft DCO, those references must be construed as referring to the corresponding provision in the DCO as made. On this basis SZC Co. will not be updating any DCO references within the certified documents and the revision of the documents to be submitted for certification are as set out in Schedule 24 (Certified Documents). Where references are made in Deadline 10 submissions to DCO provisions, unless otherwise stated such references are to the draft numbering in Revision 10 (Examination Library ref. [REP8-035](#)) but the substance of the equivalent provision in Revision 11 (Doc Ref. 3.1(J)).

Taking Matters Further

Please do not hesitate to contact me if I can help in any way to clarify further any matters associated with this letter.

Yours sincerely

Carly Vince
Chief Planning Officer
